PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with hands-on production experience building modern web applications, e-commerce platforms, shipping systems, and API-driven services. Expert in React.js, Next.js, Vue.js, Node.js, Express.js, and TypeScript. Proven track record delivering scalable, maintainable solutions — including FedEx/UPS shipping integrations, Directus CMS workflows, and Looker analytics dashboards. Passionate about clean code, performance optimization, and seamless user experiences.

TECHNICAL SKILLS

Frontend

React.js	Next.js	Vue 3 / Nuxt 4	TypeScript	PrimeVue 4	Pinia	Tailwind CSS
----------	---------	----------------	------------	------------	-------	--------------

Backend & Data

Node.js	Express.js	Directus CMS	Directus SDK	REST APIs	Looker	Firebase
---------	------------	--------------	--------------	-----------	--------	----------

Integrations & Tools

FedEx API	UPS API	Vitest	ESLint / Prettier	Git / GitHub	Vercel	Postman
-----------	---------	--------	-------------------	--------------	--------	---------

PROFESSIONAL EXPERIENCE

Frontend / Full Stack Developer

Jan 2025 – Present (1 yr 5 mos)

Algotix.ai · Bahawalpur, Pakistan · Full-time · Currently Employed

- Architected and shipped scalable web applications using React.js, Next.js, TypeScript, Tailwind CSS, and Vue.js in a production environment with 100,000+ users.
- Developed RESTful backend services and APIs with Node.js and Express.js, enabling seamless full-stack integration and data workflows.
- Engineered FedEx and UPS carrier integrations including real-time rate calculation, label generation, and full checkout automation pipelines.
- Built a Directus CMS-driven shipping accessorial management system handling complex dynamic business rules and configurations.
- Created reusable, accessible UI component libraries following WCAG standards and modern design system principles.
- Implemented Looker-based analytics dashboards delivering real-time KPI tracking and business intelligence for stakeholders.
- Collaborated in Agile/Scrum cross-functional teams with product managers, designers, and QA engineers to ship production features on schedule.

FEATURED PROJECTS

Enterprise Shipping Platform — Liberty Supply Connect

■ [connect.libertysupply.dev](#)

[Nuxt 4](#) · [Vue 3](#) · [TypeScript](#) · [PrimeVue 4](#) · [Pinia](#) · [Directus CMS](#) · [Directus SDK](#) · [FedEx API](#) · [UPS API](#) · [Looker](#) · [Vitest](#)

- Built a full-scale enterprise shipping platform as a pure TypeScript frontend using Nuxt 4 / Vue 3 with Composition API (script setup) and PrimeVue 4 component library on the Aura preset.
- Architected Pinia state management stores (auth, navigation) and custom composables (useDirectusCrud, useBusinessPartners, useCreateBusinessPartner) for clean, reusable data layer abstraction.
- Integrated Directus headless CMS as the sole backend via @directus/sdk — managing collections including business_partners, contacts, phone_numbers, shipping_accounts, and countries with full CRUD workflows.
- Implemented secure authentication and 2FA flows entirely through the Directus SDK with token management handled at the SDK level — no manual token storage.
- Integrated FedEx and UPS carrier APIs for real-time rate calculation, automated label generation, shipment tracking, and checkout automation workflows.
- Built and embedded Looker dashboards delivering real-time shipping analytics, order trends, revenue metrics, and operational KPIs inside the platform.
- Applied mobile-first CSS using PrimeVue design tokens (--p-* CSS variables) with a custom Aura preset for consistent, scalable UI theming across all components.
- Maintained code quality with ESLint + Prettier, unit tested components using Vitest + @vue/test-utils + happy-dom, and enforced strict typing with vue-tsc.

Developer Portfolio Website

[Next.js](#) · [TypeScript](#) · [Tailwind CSS](#) · [Vercel](#)

- Engineered a fully responsive, performance-optimized portfolio achieving Lighthouse score 95+ across all categories.
- Deployed on Vercel with CI/CD pipeline, delivering sub-second load times and optimal Core Web Vitals metrics.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Aug 2020 – Sep 2022

[Islamia University of Bahawalpur](#)

- Core focus on web development, software engineering principles, data structures, and algorithms.
- Delivered full-stack academic projects demonstrating proficiency across frontend and backend technologies.
- Actively engaged in UI/UX design tasks and real-world application development throughout the programme.

CORE COMPETENCIES

- | | |
|---|---|
| ■ Full Stack Web Application Development | ■ CMS Integration & Content Workflow Design |
| ■ Third-Party API & Shipping Carrier Integrations | ■ Performance Optimization & Core Web Vitals |
| ■ Agile / Scrum Methodology | ■ CI/CD Pipelines & Cloud Deployment (Vercel) |
| ■ Component-Driven UI Architecture | ■ Cross-Team Collaboration & Code Review |
